DETAILED ACTION

1. Claims 1-21 are presented for the examination.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-5, 7-12, 14-19, and 21 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by over Matsuzawa Pat- No: JP402149041A.
- 4. As per claims 1, and 8, Matsuzawa teaches the invention comprising:
- a. a collision detection [sends a jam signal and detecting collision if other station uses the line, abstract, lines 15-16];
- b. determining restricted back off time [back off time], which is substantially equal or less than a restricted time value [minimum back off time, abstract, lines 18-19];
- c. causing the peripheral component to wait for restricted back off time before trying to retransmit [abstract, lines 16-17].
- 5. As per claims 2-5, 7-12, 14-19, and 21

Matsuzawa teaches an Ethernet network in CSMA/CD system with appropriate network interface [abstract, line17].

Application/Control Number: 09/371,463

Art Unit: 2185

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 8. Claims 6, 13, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuzawa Pat-No: JP402149041A as applied to claims 1-5, 7-12, 14-19, and 21 above, and further in view of Berkema et al., US Patent Number 5,699,515.
- 9. Matsuzawa does not teach in detail about the method of determination for the restricted back off time. Berkema et al, teach in detail to calculate the back off time using random number generating function [35, fig. 2, col. 2 lines 50-55 col. 4, lines 24-28]. It would have been obvious to one of an ordinary skill in the art to combine the teachings of the cited reference because they both directed to the problem of back off scheme for access on a local area network, and Berkema et al. teach the details in generating the back off time used by Matsuzawa.

Art Unit: 2185

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nitin C. Patel whose telephone number is 703-305-3994. The examiner can normally be reached on 8:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas C. Lee can be reached on 703-305-9717. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7239 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.

THOMAS LEE
SUPERVISORY PATENT EXAMINER
